Expert Security UK

YOUR TRUSTED SECURITY PARTNER

Installing Security Systems across the UK

Expert Security UK has been providing bespoke security systems for decades.

Wherever you are based in the UK, you can benefit from our huge range of products and expertise. From electric sliding gates to pedestrian turnstiles we've got everything you need to protect your premises.

Customer care is at the heart of everything we do and this has enabled us to build strong relationships with a host of major companies across a wide range of industry sectors.

Our reputation continues to grow and we are an E3 Business Award-winning organisation.

Our services include:

♥ Design

If you have any questions about our security systems, our highly experienced sales and design team will be able to answer them. We always bear your needs in mind, and aim to provide you with an affordable solution that meets your specific criteria.

♥ Install

Our installation teams cover the length and breadth of the UK, ensuring that you benefit from a speedy, reliable service. All of our engineers are highly skilled and are trained to install all of our new products in an efficient manner. They also work closely with your designated project manager, which means your security system will be up and running in no time.

♥ Maintain

It's vital that your security systems remain in perfect working order, which is why we have dedicated maintenance and service teams whose sole remit is to maintain existing installations. You'll have peace of mind that everything is working as it should be and fully compliant.

Industries we serve:

Education

Logistics

Hospitality

Construction

Transportation

Banks

Manufacturing

Domestic

COMMERCIAL SECURITY GATES

Secure, Robust, Trusted

Here at Expert Security UK we know that securing your premises is top priority not just from a security point of view but also to ensure health and safety on your site. This is why commercial security gates are our most popular system and with over 500 security gates installed at sites all over the country we know what type of gate is required.

We offer three main types of security gates - available as fully automated or manual.

🛡️ Sliding Gates

Our sliding gate systems are strong, robust and offer an extremely high level of security. Available in sizes from 3m to 14m this type of gate is perfect for large entrances where a high level of security is needed.

🛡️ Swing Gates

Automated swing gates are found on most premises and offer a high level of security and available in a number of styles and infills. Sizes a swing gate system can cover are between 2m-10m. On some occasions it is also possible for us to automate your existing manual gates.

🛡️ Bi-Fold Speed Gates

Ideal for quick access. Bi-folding security gates take up far less room than traditional designs, and typically open at more than twice the speed. they're ideal for use in facilities that require fast entry and exit.

CAR PARK BARRIERS

Quick, Easy and Safe Access

Car Park Barriers provide a quick and cost effective solution to secure your car park from unauthorised vehicles. We have a variety of different models for all entrance sizes and layouts. All our barrier systems can be integrated to existing access control or we can provide new ones including proximity readers, ANPR and Intercoms. We also have a range of manual barriers that are perfect for locking up a car park when not in use.

Automatic Barriers

Sometimes it's best to keep things simple and effective. Perfect for most facilities with a security level requirement of low-to-medium - our automatic car park barriers prove to be incredibly popular.

Manual Swing Barriers

Our Manual Barriers & Gates provide a cost-effective, long lasting and low maintenance solution to vehicle control. Our bespoke barriers are ideal for parking, road access and traffic management requirements.

Manual Lift Barriers

Simple yet practical manual arm barriers. You don't have to break the bank to protect yourself. Thanks to their balanced design and simple pivot mechanism, our manual arm barriers are completely effortless to operate.

RISING BOLLARDS

Subtle, Sleek, Efficient

We specialise in a large range of security bollards, parking posts and many other products that are all designed to ensure the security of your premises. Whether you require high performance commercial bollards or manual pull-up bollards to protect your home's driveway, we can help keep you secure.

We offer the following types of rising bollards:

♥ Driveway Bollards

A secure alternative to the more costly and intrusive security gates. Despite their small size, they're robust and easy to install, making them ideal for protecting driveways and car park entrances.

♥ Commercial Bollards

Offering subtle security, our automatic bollards are incredibly unobtrusive when in the retracted position. Robust and reliable, they can be installed on a vast range of premises with minimal impact on day-to-day access for customers.

♥ Telescopic Bollards

An easy and cost-effective solution. Our telescopic bollards let you secure your premises without the need for high walls or complex barriers and gates. Their unobtrusive and simple-to-use design means they're perfect to place on forecourts, car parks and shop fronts.

PEDESTRIAN SPEED LANES AND TURNSTILES

Reliable, Access, Control

Our turnstiles and pedestrian lanes will help you control the volume of incoming pedestrian traffic by creating an orderly flow of personnel with minimal inconvenience to the day-to-day runnings of your business. No matter where your site is located or its size, you'll be sure to find the perfect turnstile security solution here at Expert Security UK.

♥ Pedestrian Speed Lanes

Increasingly popular with businesses and government facilities the world over, they allow you to automate access to certain areas in a way that captures all pedestrian traffic whilst cutting down on your operational (staffing) costs.

♥ Full Height Turnstiles

Safely control the volume of incoming pedestrian traffic with our full height turnstiles. Constructed from shot-blasted steel, our turnstiles are incredibly durable and built to last. They're also finished with a zinc-primed coating, helping to give your premises a modern and professional look.

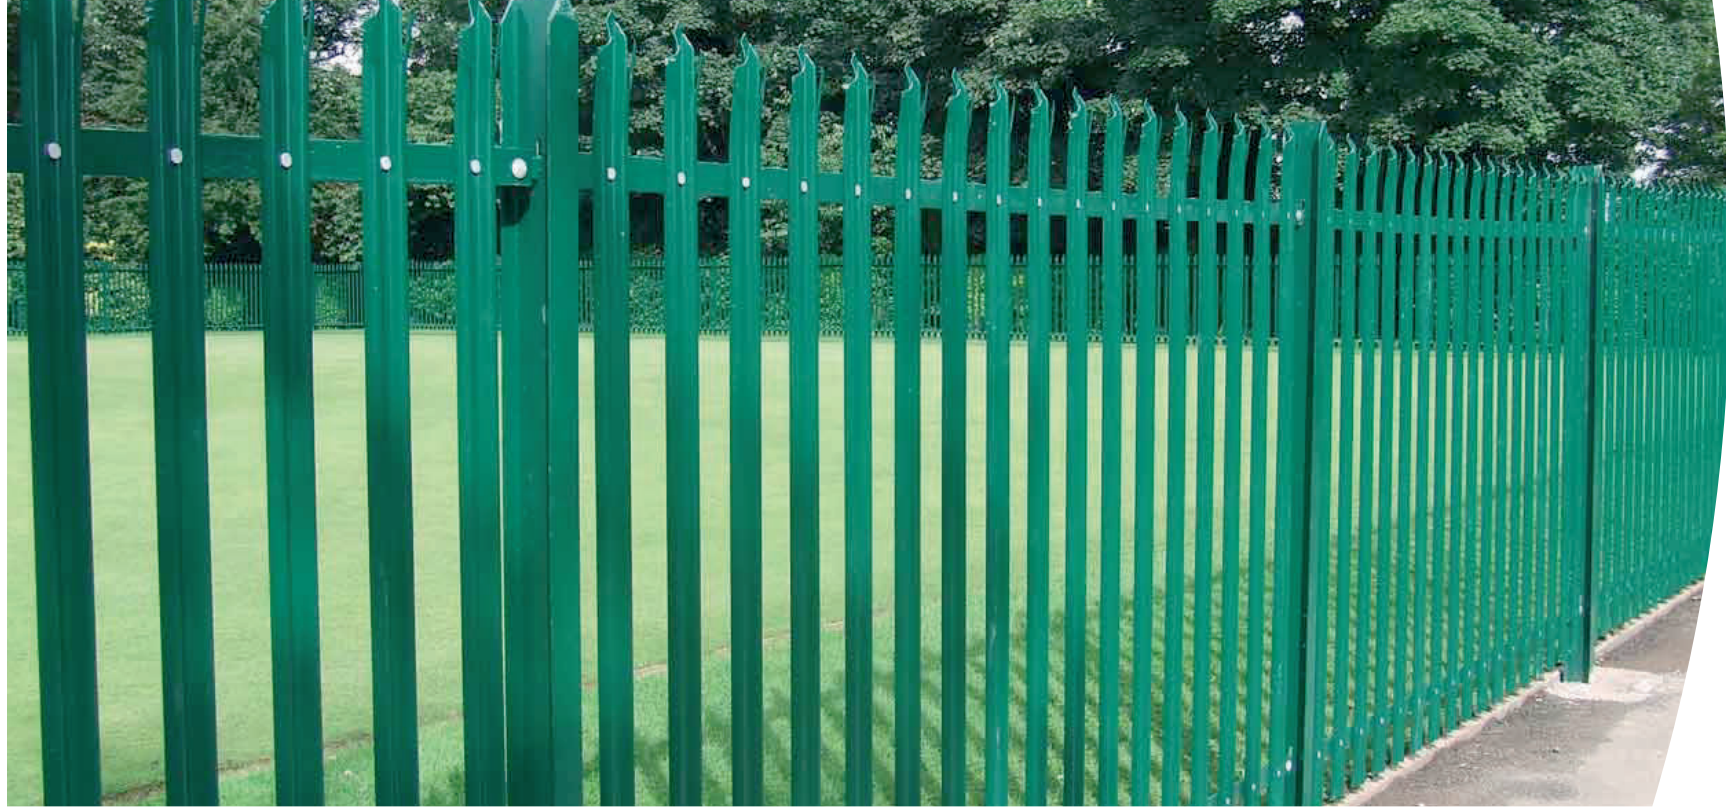

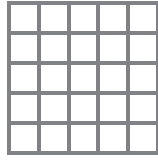

♥ Waist Height Turnstiles

waist-height turnstiles, an efficient and effective solution to visitor crowd control. These will keep your internal lobbies and entryways secure and they empower you to control access without the need for hiring extra security personnel.

PERIMETER FENCING

Sturdy, Robust, Decorative

In addition to our entrance products we also offer a range of high quality perimeter fencing. Having recently been awarded the T2 installer award for fencing we can offer the full solution for securing the whole perimeter around your site. From sturdy palisade to bespoke steel we have you covered.

Palisade

Palisade has been around for many years and is still very popular today. It is very strong and sends out a clear message that the site is protected.

Steel Mesh

Available in a wide variety of profiles and sizes, mesh fencing has fast become the fencing of choice for many sites. Quick to install and looks the part.

Decorate

For projects that require a more aesthetically pleasing feel our range of decorate fencing and railings has you covered. Our range includes privacy screen fencing, vertical bar and aluminium to name a few.

HOSTILE VEHICLE MITIGATION

Terror Attack, High Security PAS68

For sites that require the top level security such as airports, banks, government buildings and police stations we have a vast range of products that hold PAS68 or IWA certifications. These types of projects are very specialist and require careful planning and attention. From crash rated gates, bollards and blockers our counter terror systems will ensure your site is safe from vehicle attack.

♥ HVM Bollards

A flexible bollard alternative to a static bollard where access is required, but crash tested for added security from a counter attack. Available as standard in a number of durable finishes to any standard RAL colour.

♥ HVM Gates

Our crash tested bi-folding gates are trusted by clients across the globe including governments, military, petro-chemical, financial, transport and utilities, supported both internationally and locally by our experienced qualified installation, commissioning and maintenance engineers.

♥ HVM Blockers

A PAS 68: 2010 compliant crash tested road blocker, designed to withstand a hostile vehicle-borne improvised explosive device and stop the vehicle dead in its tracks.

Why take up a security system maintenance agreement?

The short answer is to ensure your system works efficiently and is safe to use.

The long answer is that in accordance with the supply of machinery (safety) regulations 1992, it is a requirement that the end user/customer of all industrial and automated systems shall establish a full documented maintenance regime that aligns with the manufacturer's recommendations. It is also a requirement of British Standards (BS-12453) that a biannual service of safety systems be carried out by a competent body.

Our security system maintenance services give you complete peace of mind that your premises will be protected at all times.

All of our products are installed by professionals and come with a 12-month guarantee that covers you for any call outs or faults that are not a result of misuse or vandalism. We're confident that your systems won't develop any problems, but you can rest assured that we'll be there to rectify things quickly in the unlikely event of a fault developing.

You will benefit from:

12 months warranty

Fast reliable service

Dedicated engineers

Scheduled maintenance

Regular checks

Compliance reports

Risk assessment Report

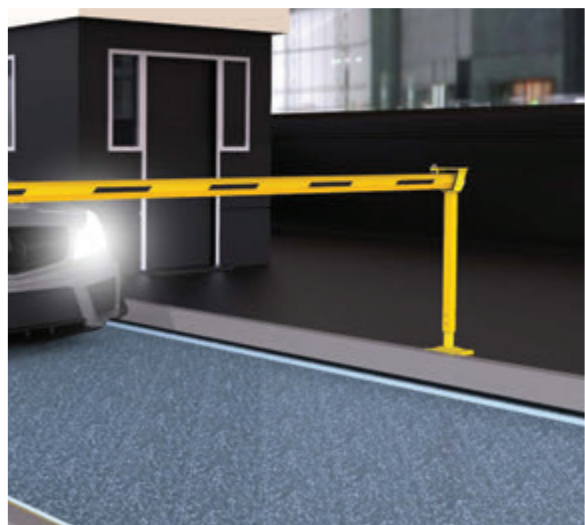

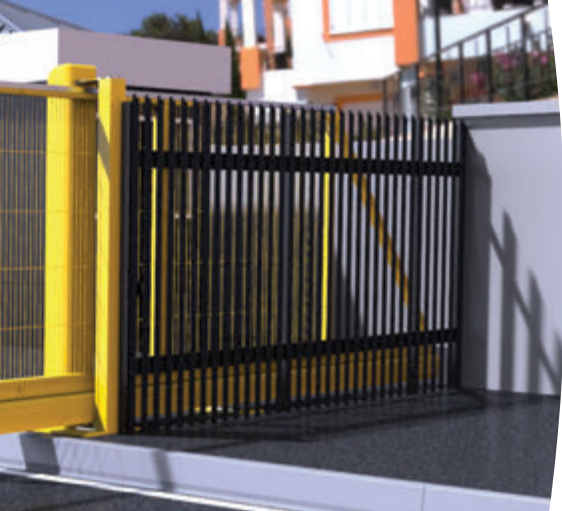

Full service reports
